

# Manual Hand Crank For Greenhouse Sidewall Ventilation

by Jiggly Greenhouse®

## MRUP300 - Manual Sidewall Ventilation Crank

- Designed with a 4:1 Gear Ratio that allows for quickly and easily rolling up greenhouse sidewalls that use a poly film covering.
- Rust-Resistant durable plastic resin enclosure with stainless steel handle is made to last, while also making it possible to effortlessly lift sidewalls up to 295 ft. long.
- Self-Locking and Automatic Braking mechanisms grasp onto roller guides, holding sidewalls in place once rolled up.
- Simply slide the MRUP300 Sidewall Ventilation Crank over the guide pipe, attach the drive shaft to the 3/4" Sidewall EMT Conduit and watch how easily the greenhouse sidewalls roll up and lock.

# Manual Hand Crank For Greenhouse Sidewall Ventilation

by Jiggly Greenhouse®

## MRUP300 - Manual Sidewall Ventilation Crank

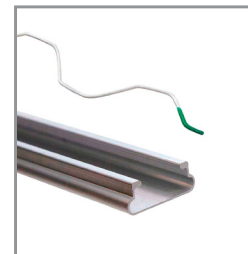

The MRUP300 Greenhouse Sidewall Ventilation Crank by Jiggly Greenhouse® is used to roll up the sides of greenhouses and other outside enclosures that use poly film coverings in order to provide ventilation while also closing with ease. Every aspect of this hand crank is user friendly, cost-effective and made to last. The crank's weather-resistant stainless steel handle and hard plastic resin casing were designed so that year-after-year, our customers can consistently rely on it to get the job done. Additionally, with a Gear Ratio of 4:1, the hand crank makes rolling up heavy greenhouse sidewalls a smooth and effortless process. Whether its a DIY backyard greenhouse or a commercial agricultural operation, the Jiggly Greenhouse® MRUP300 will get the job done!
