Tree Tie Webbing

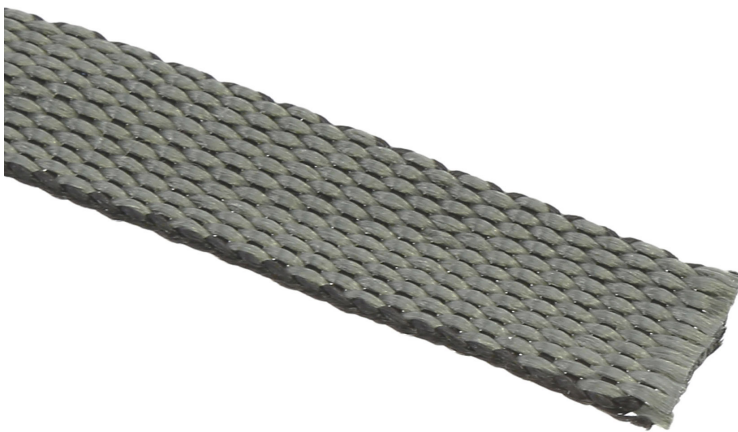

Tree & Shrub Stabilization

by Jiggly Greenhouse®

JG-TTW34 - 3/4" Tie-Down Webbing For Guying & Staking

Jiggly Greenhouse® Tree Tie Webbing provides support for young trees and newly transplanted large trees, protecting them from high winds while they grow sturdy roots. This versatile webbing is also used to shape vegetation, as well as guying and staking any size tree boasting a tensile strength of 1,000lbs. It features a natural, olive green polypropylene fabric guaranteed to last season after season with embedded UV resistant properties promoting long-lasting color that blends in with the tree and its surroundings. The soft exterior of this Tree Tie Webbing prevents plant and bark damage yet remains more reliable than commonly used rope or twine, with unyielding strength to support even the largest newly transplanted trees. The Jiggly Greenhouse® Tree Tie Webbing is a cost-effective solution to support a variety of plant life to form solid roots despite the elements.
